# 1 Introduction

The Indiana Transportation Museum, Inc. (“ITM”) provides the below *60-Day Short-Term Response Update* (“STR”) per the City of Noblesville’s (“City’s”) demand of 5/30/17. The STR is effectively a progress report and schedule of activities necessary to rectify potential violations and regulatory compliance initiatives since our *30-day Response Update* report, dated 6/29/17.<sup>1</sup>

The City issued its letter to the ITM on 5/30/17<sup>2</sup> that explained how the WRTV-6 news media outlet informed the City that it observed several chemicals and petroleum products that appeared to be improperly stored and sealed when it visited the ITM during the week of 5/15/17. Additionally, WRTV-6 observed chemical staining on the grounds of the maintenance area. In response, the City inspected the property it leases to the ITM (“Property”)<sup>3</sup> on 5/17/17, reported its observations to the Indiana Department of Environmental Management (“IDEM”), who in turn inspected the Property on 5/31/17.

<sup>4</sup> The Property’s location is shown on Figure 1.

## 2 Points of Contact

The ITM takes this matter very seriously. As a result, the ITM has retained several points of contact to handle communications associated with this matter as outlined below.

### **2.1 ITM Points of Contact**

Mr. John McNichols  
Chair  
Indiana Transportation Museum Inc.  
P.O. Box 83  
Noblesville, IN 46061

Mr. Les McConnell  
Vice Chair  
Indiana Transportation Museum Inc.  
P.O. Box 83  
Noblesville, IN 46061

### **2.2 Legal Point of Contact**

The ITM may be reached through Barnes & Thornburg LLP as its legal counsel in this matter. The ITM's point of contact at Barnes & Thornburg is:

Mr. David Gillay, Esq.  
Barnes & Thornburg LLP  
11 South Meridian Street  
Indianapolis, IN 46204-3535

[david.gillay@BTLaw.com](mailto:david.gillay@BTLaw.com)  
(317) 231-7474

### **2.3 Environmental Consultant Point of Contact**

The ITM retained The Environmental Liability and Asset Management Group, LLC (dba The ELAM Group) as its environmental consultant. The point-of-contact and Licensed Professional overseeing this matter is:

James P. Hogan, LPG #2166  
President & CEO  
The ELAM Group  
176 W. Logan Street, Suite 147  
Noblesville, IN 46060

[james.hogan@elamusa.com](mailto:james.hogan@elamusa.com)  
(888) 510-3526 x102

## 3 Response Procedures & Timeline

Since the ITM received the City's letter on 6/1/17, it conducted several actions over the first 30 days as outlined in the *30-Day Response Update* report, dated 6/29/17. This update contains actions and a schedule for the ITM's work to inventory, characterize, containerize, transport and dispose of waste identified within the Property.

### **3.1 Waste Inventory**

Between 6/13/17 and 7/26/17, The ELAM Group prepared a detailed inventory of chemicals within the Property. The period of time to complete the inventory was extended beyond the anticipated completion date provided in the *30-Day Response Update* due in part to the relatively high volume of chemicals to inventory throughout the Property and also in part to coordinating proper safe access to each of the rail cars within which several of the chemicals reside.

The inventory consists of 1060 items. For each item, an ELAM scientist documented the container's volume, label, expiration date and location within the Property. The chemical inventory is summarized in Table 1, and the chemical locations are cross-referenced on Figure 2.

### **3.2 Waste Characterization & Disposal Schedule**

Three qualified waste disposal contractors, American Industrial Services ("AIS"), Heritage and Liquid Waste Removal ("LWR"), visited the Property after the majority of the chemical inventory was complete. The purpose of the pre-contractor meeting was to afford each contractor an opportunity to assess the characterization, containment, transportation and disposal logistics required to perform the work. A single waste removal contractor will be selected next week to assist with these activities.

Once selected, the contractor will immediately commence with the work. Before the field activities begin, approximately two to three weeks of lead time will be necessary to secure the labor, materials and supplies for the project. Overall, the schedule will generally proceed as follows:

- ❑ Weeks 1-3: contractor lead-time for arranging labor, materials and supplies

- ☐ Week 3: initial field screening and sample collection
- ☐ Weeks 3-4: laboratory analysis, determination of hazardous or nonhazardous waste, materials consolidation and containment
- ☐ Week 4 (8/28/17): submittal of a *90-Day Response Update* report that includes a Remediation Plan (“RP”) to the City outlining the above-referenced activities associated with containment as well as the foregoing removal outlined below as requested in the City’s 5/30/17 letter
- ☐ Weeks 5-9: nonhazardous and hazardous waste profiling<sup>5</sup>
- ☐ Week 6: nonhazardous waste loading, transportation and disposal
- ☐ Week 10: hazardous waste loading, transportation and disposal

---

<sup>5</sup> Hazardous waste landfills often require up to 30 days to approve hazardous waste profiles.

---

## 4 Summary

The ITM is dedicating adequate resources to the tasks necessary to comply with the demands of the City as well as the laws of the State of Indiana. Should the City have any questions relating to this report, please reach out to the proper points of contact outlined in Section 2.0.

Project No. INHN825P1.2

Date: 7/29/17
